*A course of instruction is a stand-alone course that meets for an extended period of time and provides instruction that may or may not be related to a program of study, but is either is not part of the sequence or can be taken independent of the full sequence as a stand-alone option. A course of instruction may directly prepare students for certification or other completion credential or it can stand alone as an optional preparation or, in the case of students requiring catch-up work, a prerequisite for a program. A stand-alone course might lead to a credential to be used toward preparing individuals for a trade, occupation, vocation, profession; or it might improve, enhance or add skills and abilities related to occupational/career opportunities.

Note: As indicated in the PBVS Administrative Rules, Section 1095.200, student retention and graduation rates must be maintained that are appropriate to standards in the field. Furthermore, a State licensing examination or professional certification examination passage rate of at least 50% of the average passage rate for schools within the industry for any State licensing examination or professional certification examination must be maintained. In the event that the school fails to meet the minimum standards, that school shall be placed on probation. If that school's passage rate in its next reporting period does not exceed 50% of the average passage rate of that class of schools as a whole, then the board shall revoke the school's approval for that program to operate in this State. Such revocation also shall be grounds for reviewing the approval to operate as an institution.
